

The UK's most comprehensive Health screen conducted in your own home! Helping you to "enjoy life for longer"

Health screening can be very expensive and is usually conducted in a clinic or hospital.

However, we have produced a health screen using the very latest mobile equipment that can be;

- Conducted privately and conveniently within a room **at your home that we turn into a sterile clinic space**
- Delivered by experienced screening practitioners and supported by GP's
- Designed to be non-invasive so only shoes and socks need to be removed
- Includes NHS approved laboratories for the none-point of care tests
- Uses the very latest medical equipment so that the majority of results can be advised **during** the screen ensuring the advice given is **specific** to the individual
- Confidential and comprehensive report sent to the participants home address
- The tests selected are relevant to you

"Medical research confirms that if medical conditions are discovered early, simple treatments can often stop the disease in its tracks, with minimal intervention required.

However, Prevent plc have also added a range of tests that don't just look at critical illnesses but also issues such as Rheumatoid Arthritis and Osteoporosis that can spoil your enjoyment of life if they are not managed as early as possible."

Dr S.D.Jones, NHS Consultant

"The FBP is £100 when purchased with an Exec + Platinum or £200 as a stand-alone product subject to the minimum value of £500 per day.

Testimonials

"We were delighted at the number of employees that opted to have the Prevent health screens. The programme was well organised by Prevent, with most of the administration handled by their team. The positive feedback from employees ranged from the arrangement of the appointments, information being provided and the health screens themselves, has been excellent and we would certainly consider running further programmes in the future."

Steve Allen, Health & Safety, HM Treasury, 1 Horse Guards Rd, London

"Setting up a health screening programme was easy. All we had to do was arrange a room and send an email out to staff to advertise the programme. We have been very pleased by the response to the health screens and there hasn't been any cost to us."

David P Griffiths MBE, Secretary, Gloucestershire Police Federation

"The Prevent health screen was very professional, offering a range of tests that provided useful information that was both reassuring and specific to me. I would certainly have another health screen with Prevent in the future."

Malcolm Farrow OBE FCMI, Asst Gen Secretary, Forces Pension Society

"Prevent plc manage everything from advertising through to booking and support. All we had to do was provide a room and send the initial emails out."

David Tugwell, Head of Compensation and Benefit, Honda Europe

"The Prevent nurse was excellent. My husband and I will certainly register again next year if the opportunity arises."

Dr Prydwen Elfed-Owens, Conwy County Borough Council

"The health screen was extremely professionally conducted and provided me with complete peace of mind. I would recommend it to everyone."

Steve Edwards, Chairman, Lancs Police Federation

"I would like to thank you for all your effort you have made with helping me to set up the health screening for our company and for your time spent with us. It went very well and had great success. I have received a lot of positive feedback."

Olga Davidenko, HR Manager, Mirae Asset Global Investments (UK)

"We were really impressed with the excellent service you provided."

Susan Baines (School Nurse), Bacup and Rawtenstall Grammar School

In May 2008 we commissioned Prevent Plc to provide health check services. The feedback from our employees was excellent and praised the comprehensive nature of the checks, the confident and sensitive professionalism of the health practitioners and the quality of the written report.

As an employer, we were delighted with the competitive price, the value of the experience to our employees and with the complimentary feedback both about Prevent Plc and us as a caring employer. We have now used them for three years.

Elizabeth Nash, HR Director, Bedford College

Good reasons to use Prevent!

- We have conducted in excess of 100,000 screens and cover the whole of the UK, Ireland and parts of Europe.
- Each practitioner is extremely experienced and has conducted thousands of health screens. In addition, every practitioner has direct access to our consultant G.P. and follows a specifically approved screening protocol.
- Conducting the assessments conveniently 'on site' (we simply need a small room with a table and two chairs) ensures that the take-up rate of our screening programmes is much higher than organisations that use clinics or hospitals.
- Not having the cost of clinics to absorb enables us to pass on the savings to the client, ensuring our prices remain competitive.
- We can manage the entire marketing, booking and appointment process via our own on-line booking system.
- Having results within the assessment enables our practitioners to provide advice that is specific to the individual and 'not' generalised.
- Clients receive 365 days of GP tele-support.
- A recent client survey revealed that 95% of participants confirmed that the Prevent plc executive health screens were better than competitor screens at twice the price.
- Approved by most cash plan providers ensuring that the cost of Prevent plc health screens can be claimed back.

"We both said that being able to have our health screens in our home made the whole opportunity much more enjoyable and much easier for us to discuss our health issues with the nurse. We decided to have the feedback on our tests together - so we could share the results."

Mr and Mrs M Kemsley, Northampton
